

Jetinno JL37A

JL37A is a modern super-automatic coffee machine designed for intensive daily use. It combines high performance, precise control of the brewing process, and consistent quality of each cup. Its intuitive controls and contemporary design make it convenient to use and visually appealing in any interior. Reliable components ensure a long service life even under heavy workloads.

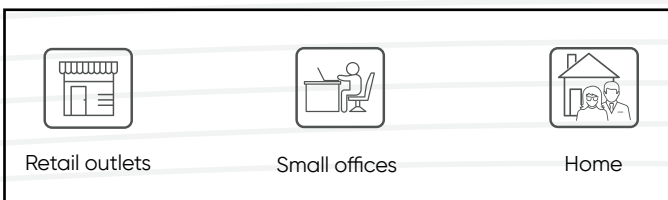

The characteristics

- ✓ Instant powders and additional syrups allow JL37A to prepare over 30 different beverages.
- ✓ Special pumps and dedicated boilers for coffee and steam allow simultaneous coffee brewing and milk frothing.
- ✓ Possibility to brew 2 cups simultaneously.
- ✓ The machine performs a full automatic cleaning cycle every time it is turned on. It is also possible to program cleaning times.
- ✓ Support of remote control for machine settings, system updates, user-interface advertising, and video uploads.
- ✓ 700 ml stainless-steel high-pressure boilers with a maximum pressure of 20 bar.
- ✓ Coffee grinders with 64 mm blades made of special high-impact-resistant steel.
- ✓ Brewing group with a volume of up to 14 g, with a possibility to install 20 g and 22 g group.
- ✓ Re-compression function for removing residual water from the coffee tablet
- ✓ With an independent milk pump and foam generator, JL37A models can easily prepare smooth and delicate hot or cold fresh milk and milk foam.
