

Jetinno JL38A

JL38A is a modern super-automatic coffee machine designed for intensive daily use. It combines high performance, precise control of the brewing process, and consistent quality of each cup. Its intuitive controls and contemporary design make it convenient to use and visually appealing in any interior. Reliable components ensure a long service life even under heavy workloads.

The characteristics

- ✓ Instant powders and additional syrups allow JL38A to prepare over 30 different beverages.
- ✓ Possibility to connect a syrup station for 4 standard-size bottles.
- ✓ With an independent milk pump and foam generator, JL37A models can easily prepare smooth and delicate hot or cold fresh milk and milk foam.
- ✓ Special pumps and dedicated boilers for coffee and steam allow simultaneous coffee brewing and milk frothing.
- ✓ Equipped with 2 independent coffee bean containers and grinders for simultaneous grinding of two different types of coffee beans.
- ✓ Fully automated cycles include rinsing, deep cleaning of the milk system, and disinfection, so no manual operations are required.
- ✓ Support of remote control for machine settings, system updates, user-interface advertising, and video uploads.
- ✓ 700 ml stainless-steel high-pressure boilers with a maximum pressure of 20 bar.
- ✓ Coffee grinders with 64 mm blades made of special high-impact-resistant steel.
- ✓ Re-compression function for removing residual water from the coffee tablet.
- ✓ The smart milk pump creates dense, silky-smooth foam.
