JL500-IN8C-PI

JL500-IN8C-PI is a modern coffee machine with a 27" touch screen that prepares more than 20 hot and cold beverages. Rich flavor, stable temperature, fast dispensing, and automatic cleaning ensure freshness, comfort, and impeccable quality in every cup, every day.

The characteristics

- ✓ More than 20 beverages, including freshly ground coffee.
- ✓ There is also a possibility to prepare protein drinks.
- ✓ The machine features an automatic cleaning function with the ability to schedule cleaning time.
- ✓ Light indicators show when the drink is ready.
- ✓ Equipped with a manual water-drain tap.
- ✓ Key machine components have a modular design easy to remove and clean.
- ✓ A large wastewater container has an overflow indicator.
- ✓ Remote control support: equipment system updates, equipment setting, advertising in the user interface, video uploads.
- ✓ Professional safety switch for STB temperature control.
- ✓ OMRON temperature/pressure sensor, real-time monitoring.
- ✓ ULKA high-pressure vibration pump.
- ✓ Heating power of 2,700 W, ensures constant and stable water temperature.
- ✓ High-pressure stainless steel boiler (700 ml), maximum pressure range of 25 bar.
- ✓ Re-compression function for removing residual water from the coffee tablet.
- ✓ Adjustable brewing time, water temperature, and water dosage.
- ✓ Adjustable mixing speed for different recipes.
